## **AZAP NIGERIA LIMITED**

### **OBJECTIVES, GOALS AND STRATEGIC PLANS**

**AZAP NIGERIA LIMITED** is engaged in Architectural designs, Engineering designs, Civil Construction works, Fabrication Maintenance & General Contractors. Using our optimal resources and current business practices, the company is determined to work safety and efficiently in accordance with the client's requirements and standards.

From the foregoing, utmost importance is given to conformance with international and local acceptance quality standards, which is also intended to sustain **AZAP NIGERIA LIMITED** in the competitive market. The company's management objective is to provide services and products, which are in conformity with BS EN ISO 9001 standard and to client's contractual requirements. To fulfill this objective, the company has decided to adopt the quality Assurance system and programme as outlined in this manual.

The Quality Management Department has the full support of the management to implement all measures contained in the quality system or programme.

Quality Managing Department is directly responsible to the Managing Director and has no functional primary responsibility or conflict or conflict of interest with any department.

It is required of all personnel to operate in strict accordance with the system, performing their tasks correctly and contribute to the application and continue improvement of the Quality Management system.

The company's policy remains as follow: "All activities by individuals or teams will be planned and executed in such a way that our customers' requirements as well as **AZAP NIGERIA LIMITED** business objectives are met safely, efficiently and cost-efficiently".

The scope of this manual is to outline the quality assurance system to be applied to company operation/project activities undertaken, and also to define the general quality assurance policy of the company.

It is worthy to note that the Quality System Requirements outlined in this Manual comply with BS EN 9001: 1994 standard.

If there should be a differential in a client's expectation regarding quality aspect of a project, a project Quality Plan will be drawn to reflect modifications required by client.

It is the intent of the company that Quality Assurance Programme outline in this manual shall apply to all activities and contracts to be carried out by **AZAP NIGERIA LIMITED** as well as to any supplier/sub-contractor engaged for the execution of company's operation.

The implementation and compliance of the company quality system is based on a documented system which consists of three levels. The first level is made up of a Quality Assurance manual. Administration documents which specify the organizational basis of the system and

key quality management procedures from the second level of quality documentation. The third tier consists specific operating procedures and work instructions. For more details of approved procedures on how the quality operations could be achieved, always make references to second and third level documents.

This quality manual and its supporting documentation shall be controlled document. Copies of this manual and the relevant sections of its supporting documentations shall be held from the level of managers to supervisors and shall always be made available to all employees. A register of all holders and focal points shall be maintained by quality assurances department.

To enhance the system, the company shall continue to maintain effectual communication with clients and other departments in order to determine the level of quality required by all.

The quality objectives of the company are listed below but not limited to:

Provide services and products which comply with all relevant statutory Requirements, Company standards, National and International Standards and are capable of achieving the performance and availability targets of the service and product specification for their duration in the most cost-effective and timely manner.

Ensure that safety or personnel, services and products, and environment have been carefully considered, and that appropriate measures have been implemented to achieve these objectives.

Obtain a certificate of fitness and all other necessary certificates for the establishment and operation of the services and products, without causing any delay in the progress of orders services.

Comply with the letter and spirit of the relevant statutory requirements and guidance notes.

Minimize scrape and re-work in the course of rendering services and products.

Actively pursue ever – improving quality through programmes that enables each employee to do his or her job right the first time.

Reduce the fighting (Crisis Management)

Guide the establishment of quality environment in terms of human resources, management, information, and facilities, setting goal and follow-up on results.

## DESIGN SERVICES

**Azap Nigeria Limited** has reputation for detailed design in both architecture and engineering design. A team of architects, civil, mechanical, chemical and electrical engineers carry out design with the latest architecture and engineering software combined with traditional engineering skills to provide practical concepts and optional design solutions. We are conversant with the following codes and standard for design services: BS, ASME, API, ASTM, DIN, NIS, NACE, ACI, DEP, SCS. Our draftsmen are vast in the use of latest AUTOCAD and CIVILCAD. We also digitize drawings using our digitizer to reduce drafting time. Simulation studies and instrumentation designs are also carried out by AZAP. Process systems designs are carried out in conjunction with our foreign technical partners. Engineering services provided by **AZAP** include:

Studies

Design

Investigation

Project  
Management

- ❖ Process System
